1. INTRODUCTION

The National Land Use Database (NLUD-PDL) provides an inventory of the national stock of brownfield sites and a tool for monitoring the supply and re-use of previously developed land and buildings by local planning authorities.

The National Land Use Database is an annual survey of Previously Developed Land (PDL) that is vacant or derelict and other previously developed land, which may be available for re-development. The annual period covers from 01 April 2007 to 31 March 2008.

This involves the recording and updating of the PDL data in St Helens and submitting a return to the NLUD project – English Partnerships (EP) being responsible for this data collection.

2. PREVIOUSLY DEVELOPED LAND

The definition of previously developed land provided below is that contained in the 2006 version of PPS3:

Previously-developed land (often referred to as brownfield land)

‘Previously-developed land is that which is or was occupied by a permanent structure, including the curtilage of the developed land and any associated fixed surface infrastructure.’

The definition includes defence buildings, but excludes:

- Land that is or has been occupied by agricultural or forestry buildings.*
- Land that has been developed for minerals extraction or waste disposal by landfill purposes where provision for restoration has been made through development control procedures.*
- Land in built-up areas such as parks, recreation grounds and allotments, which, although it may feature paths, pavilions and other buildings, has not been previously developed.*
- Land that was previously-developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape in the process of time (to the extent that it can reasonably be considered as part of the natural surroundings).*

There is no presumption that land that is previously-developed is necessarily suitable for housing development nor that the whole of the curtilage should be developed.

3. DATA COLLECTION PROCESS

Sites that meet the following criteria (see Appendix 1) were identified in the St Helens NLUD study:

- a)** Previously developed land which is now vacant
- b)** Vacant buildings
- c)** Derelict land and buildings
- d)** Land or buildings currently in use and allocated in the Local Plan and/or having Planning Permission
- e)** Land or buildings currently in use with redevelopment potential but with no Planning allocation or permission
- f)** Previously developed land or buildings which has been redeveloped or is under construction

To help compile the database of previously developed land sites in St Helens, a number of existing data sources were used:

- Housing Land Supply
- Urban Capacity Study

- Economic Land Supply
- Strategic Housing Land Availability Assessment - SHLAA (St Helens 2008)
- Estates Department – Vacant Land Sites
- Planning Permissions
- Site Surveys

4. RESULTS

4.1 THE QUANTITY OF LAND

The stock of previously developed land in St Helens at 31 March 2008 was 339.9 hectares covering 317 sites.

Of this total 69 sites totalling 163.18 hectares were derelict, 48% of the total.

In 2007 the equivalent figures were 65 sites totalling 229.32 hectares.

However the figures are not directly comparable for the following reasons: -

- i) Each year new sites are added (see Appendix 4, Inflows). While a number of these will have become vacant or derelict during the year, there can be other reasons for inclusion. This year St Helens Council has conducted a Strategic Housing Land Availability Assessment (SHLAA) to identify potential sites for residential development - the resulting survey has identified 57 suitable sites which have been added to the NLUD database. As a result there has been a small increase from 275 to 317 in the number of sites. This year, like the previous two years, no site threshold was used.
- ii) Each year some sites are deleted (see Appendix 3, Outflows). A number of these will be the result of development (see Appendix 2). Other factors can include corrections to sites being previously recorded in error, adjustments to site areas, or sites reverting to natural landscape.

Table 4.1 Total Number and Area of Previously Developed Land Sites

	No. NLUD Sites	Total Area (Hectares)	No. Derelict	Area Derelict (Hectares)
St Helens				
1 Oct 1998 – 31 March 2001	219	385.9	64	263.98
1 April 2001 – 31 March 2002	212	383.8	61	263.09

1 April 2004 – 31 March 2005	203	357.6	72	248.11
1 April 2005 – 31 March 2006	296	353.7	66	241.95
1 April 2006 – 31 March 2007	275	346.3	65	229.32
1 April 2007 – 31 March 2008	317	339.9	69	163.18

4.2 LAND DEVELOPED

Table 4.2.1 concentrates on sites that were developed during 2007/8. Development is defined when construction commences. A total of 41 Sites, 72.46 hectares were developed.

Table 4.2.1 Land Developed

	Sites Developed	Area Developed (Hectares)
St Helens		
1 April 2002 – 31 March 2003	23	28.68
1 April 2003 – 31 March 2004	29	25.11
1 April 2004 – 31 March 2005	51	19.92
1 April 2005 – 31 March 2006	55	21.93
1 April 2006 – 31 March 2007	22	18.08
1 April 2007 – 31 March 2008	41	72.46

Table 4.2.2 After use of Development Sites

Use	No. of Sites	Area (Hectares)	%
Housing	31	58.39	80
Business & Industry	8	11.39	16
Retail	0	0	0
Open Space	2	2.68	4
TOTAL	41	72.46	100%

The majority of land developed was for housing. For more detailed information on these sites see Appendix 2, Sites Developed.

4.3 LAND TYPE

Table 4.3 Total Number of Previously Developed Sites by Land Type in St Helens

	1998-2001	2001-2002	2002-2003	2003-2004	2004-2005	2005-2006	2006-2007	2007-2008
a Previously Developed Land which is now Vacant	69	65	58	51	60	145	160	168

f Previously developed land or buildings which has been redeveloped or is under-construction				35	51	55	22	41

sites being previously recorded in error, merged or reverting to natural landscape							5	7
Total	219	212	203	226	203	296	275	317

Table 4.3 shows the number of previously developed sites by Land Type. 80% of the sites are in the first 3 categories of vacant or derelict land and buildings.

4.4 DISTRIBUTION

Table 4.4 Distribution of Previously Developed Land

Wards	Sites		Area		Ward	
	NLUD Sites	% Sites	NLUD Sites Area (hectares)	% of Area	Ward Area (hectares)	Sites as % of Ward Area
Billinge & Seneley Green	7	2.21%	0.35	0.10%	1061	0.03%
Blackbrook	10	3.15%	2.56	0.75%	327.7	0.24%
Bold	17	5.36%	21.4	6.30%	1967	2.02%
Earlestown	38	11.99%	13.8	4.06%	462	1.30%
Eccleston	7	2.21%	20.62	6.07%	970.8	1.94%
Haydock	23	7.26%	12.63	3.72%	1407	1.19%
Moss Bank	15	4.73%	30.56	8.99%	566.1	2.88%
Newton	23	7.26%	78.85	23.20%	702.9	7.43%
Parr	34	10.73%	16.56	4.87%	443.4	1.56%
Rainford	7	2.21%	2.5	0.74%	3085	0.24%
Rainhill	3	0.95%	3.48	1.02%	659.1	0.33%
Sutton	22	6.94%	16.01	4.71%	228.3	1.51%
Thatto Heath	29	9.15%	27.06	7.96%	581.6	2.55%
Town Centre	69	21.77%	88.29	25.97%	583.5	8.32%
West Park	4	1.26%	1.49	0.44%	248.1	0.14%
Windle	9	2.84%	3.77	1.11%	293.3	0.36%
TOTAL	317	100%	339.9	100%	13,587	

The 2008 NLUD survey shows 2.5% of the area of land in St Helens is brownfield with just over a quarter of this previously developed land concentrated in the Town Centre. There are 69 Sites (22% of all sites) in the Town Centre Ward with a total area of 88.29 hectares, and the highest amount (25.97%) of previously developed land, covering 8.3% of the total ward area. This is followed closely by Newton (23.12% of previously developed land, covering 7.4% of the total ward area).

Rainhill has the lowest figure with only three recorded previously developed land sites in the Ward.

4.5 OWNERSHIP

Table 4.5 Ownership of Previously Developed Land in St Helens

Ownership	Sites	Area (Hectares)	% of Area
Local Authority (1)	48	41.41	12.18%
Private (3)	181	249.82	73.49%
Other Public (2)	22	1.7	0.50%
Not Known (4)	55	45.52	13.39%
Mixed (5)	11	1.48	0.44%
Total	317	341	100%

The majority (73.49%) of sites are identified as in private ownership. Sites in Local Authority ownership account for around 12%.

4.6 PLANNING STATUS

Table 4.6 Planning Status of Previously Developed Land in St Helens

Planning Status	Sites	Area (Hectares)	% of Area
Allocated in Development Plan	21	51.76	15.23%
Detailed Planning Permission	95	110.01	32.36%
Outline Planning Permission	20	8.74	2.57%
None	181	169.42	49.84%
Total	317	339.9	100%

Around 30% are subject to detailed planning proposals. Roughly 15% are allocated in the Development Plan. Around half of the sites have no Planning Status.

4.7 PREVIOUS USE AND DERELICTION

The largest previous use of previously developed land is Industry & Business, accounting for around 35% of total sites identified. Minerals come next, with 31%. Other significant uses include Residential with 187 sites and 13%.

Table 4.7 Previous Use of Previously Developed Land in St Helens

Previous Use	Sites	Area (Hectares)	% of Area
Agriculture & Fisheries	0	0	0.00%
Forestry	0	0	0.00%
Minerals	8	105.15	30.93%
Recreation & Leisure	4	0.48	0.14%
Transport	10	20.09	5.91%
Utilities & Infrastructure	5	18.39	5.41%
Residential	187	45.34	13.34%
Community Services	13	10.22	3.01%
Education	2	1.66	0.49%
Retail	14	3.86	1.14%
Industry & Business	62	120.97	35.59%
Vacant Land and Buildings	12	13.77	4.05%
Defence	0	0	0.00%
Unused Land	0	0	0.00%
Total	317	339.9	100%

4.8 FUTURE USE

Employment as the proposed use accounted for around 36% with Housing accounting for 29%. Very few sites are proposed for Retail.

As a separate question, the NLUD survey asks if sites are suitable for housing. In St Helens, 48% of previously developed land is considered suitable for Housing – almost 2 times the 29% that is proposed for Housing ie. Is subject to an allocation in the local plan or has a detailed/outline planning permission on the site.

Table 4.8 Proposed Use of Previously Developed Land in St Helens

Proposed Use	Sites	Area (Hectares)	% of Area
Housing	233	97.64	28.72%
Employment	49	122.41	36.01%
Retail	2	2.91	0.86%
Mixed with housing component	15	46.32	13.63%
Open Space	13	29.21	8.59%
Other	4	25.42	7.48%
Mixed without housing	1	16.02	4.71%
Total	317	339.9	100%

4.9 SIZE

The NLUD database shows 33.41% of all previously developed land in St Helens is located on sites less than 2.5 hectares in size with 24.55% of land on sites between 10 & 20 hectares in size.

Table 4.9 Size Breakdown of Previously Developed Land in St Helens

Size Band	Sites		Area	
	No	% Sites	Hectares	% of Area
< 2.5	291	91.80%	113.58	33.41%
2.5 - 5	12	3.79%	39.37	11.58%
5 - 10	7	2.21%	49.5	14.56%
10 - 20	6	1.89%	83.46	24.55%
20>	1	0.32%	54.02	15.89%
TOTAL	317	100%	339.93	100%

4.10 PERFORMANCE TARGET

The new performance framework for local government contains a set of national outcomes and a set of national indicators by which to measure progress against them.

National Indicator 170 is in place to gauge the success of local authorities in facilitating the re-use of brownfield land as a contribution to regeneration and economic growth. This indicator measures the proportion of the area of developed land that is vacant or derelict for more than 5 years.

In 2007 there were 15.32 hectares (ha) of vacant land on NLUD-PDL for more than 5 years, 0.33 ha of vacant buildings on the database for more than 5 years, and 140.15 ha of derelict land and buildings in NLUD-PDL for more than 5 years. The total hectares of developed land within the area of the local authority is 4029.6 ha. The proportion of developed land represented by vacant and derelict land is therefore 3.87%.

See Appendix 6 (page 22) for the definition and formula of National Indicator 170.

APPENDIX 1 - DEFINITIONS OF PREVIOUSLY DEVELOPED LAND & BUILDINGS

The definitions of previously developed land provided below is that given in the National Land Use Database (NLUD) Data Specification v2.2, published on 04 October 2000:

a) PREVIOUSLY DEVELOPED LAND WHICH IS NOW VACANT

Land that was previously developed and is now vacant which could be developed without treatment. Treatment includes any of the following: demolition, clearing of fixed structures or foundations and leveling. Land previously used for mineral extraction or waste disposal which has been or is being restored for agriculture, forestry, woodland or other open countryside use is excluded.

b) VACANT BUILDINGS

*Vacant buildings, **unoccupied for one year or more**, that are structurally sound and in a reasonable state of repair (i.e. capable of being occupied in their present state). Includes buildings that have been declared redundant or where re-letting for their former use is not expected. Includes single residential dwellings where they could reasonably be developed or converted into 10 or more dwellings.*

c) DERELICT LAND AND BUILDINGS

Land so damaged by previous industrial or other development that it is incapable of beneficial use without treatment. Treatment includes any of the following: demolition, clearing of fixed structures or foundations and leveling. Includes abandoned and unoccupied buildings (including former single residential dwellings) in an advanced state of disrepair i.e. with unsound roof(s).

Excludes land damaged by development which has been or is being restored for agriculture, forestry, woodland or other open countryside use.

Excludes land damaged by a previous development where the remains of any structure or activity have blended into the landscape in the process of time (to the extent that it can reasonably be considered as part of the natural surroundings), and where there is a clear reason that could outweigh the re-use of the site - such as its contribution to nature conservation - or it has subsequently been put to an amenity use and cannot be regarded as requiring redevelopment.

d) LAND OR BUILDINGS CURRENTLY IN USE AND ALLOCATED IN THE LOCAL PLAN AND/OR HAVING PLANNING PERMISSION

*Includes all sites, **currently in use (with the addition of buildings that have been vacant for less than one year)**, allocated for development in the adopted plan or with outstanding planning permission where redevelopment has not started. Includes all single residential dwellings having planning permission yielding at least one additional dwelling.*

e) LAND OR BUILDINGS CURRENTLY IN USE WHERE IT IS KNOWN THERE IS POTENTIAL FOR REDEVELOPMENT (BUT THE SITES DO NOT HAVE ANY PLAN ALLOCATION OR PLANNING PERMISSION)

*Includes sites **currently in use (with the addition of buildings that have been vacant for less than one year)** that are likely to be disposed of by their owners for redevelopment or conversion in the next five years.*

The recognition of potential sites for redevelopment will depend to some degree on local knowledge and judgment. The objective here is to identify major potential redevelopment sites before they reach the planning permission stage. It is not envisaged that extensive surveys will be carried out to develop a comprehensive and site-specific assessment of land and buildings falling in this category.

f) PREVIOUSLY DEVELOPED LAND OR BUILDINGS (ALREADY ENTERED ONTO THE DATABASE) THAT HAVE BEEN REDEVELOPED OR WHERE CONSTRUCTION HAS STARTED

Land or buildings already entered onto the database (e.g. for NLUD Phase 1) but which are now out of scope following redevelopment (including creation of open space and outdoor recreation). Includes sites where planning permission has expired.

APPENDIX 2 - SITES DEVELOPED

This table shows details of Previously Developed Land or Buildings which have been subject to redevelopment or where construction has commenced in 2007-2008. They are recorded as category 'f' in table 4.3 on page 5. There are 41 identified sites where development has taken place during the study period, totalling 72.46 hectares. The table also shows the type of redevelopment which has taken place on each site.

APPENDIX 6 - NI 170: NATIONAL INDICATOR

NI 170: Previously developed land that has been vacant or derelict for more than 5 years			
Is data provided by the LA or a local partner?	Y	Is this an existing indicator?	N
Rationale	To gauge the success of local authorities in facilitating the re-use of brown field land as a contribution to regeneration and economic growth.		
Definition	<p>This indicator measures the proportion of the area of developed land that is vacant or derelict for more than 5 years.</p> <p>The total area of developed land is the area recorded for the relevant local authority for 2001 in the urban land figures published in the Urban Settlements report by DCLG.</p> <p>The National Land Use Database of Previously-Developed Land (NLUD-PDL) contains a typology of previously developed land covering a number of different categories including vacant and derelict land:</p> <p><i>‘Previously developed land which is now vacant is land that could be developed without treatment. Treatment includes any of the following: demolition, clearing of fixed structures or foundations and levelling. Land previously used for mineral extraction or waste disposal which has been or is being restored for agriculture, forestry, woodland or other open countryside use is excluded.</i></p> <p><i>“Vacant buildings” are buildings that have been unoccupied for one year or more, that are structurally sound and in a reasonable state of repair (i.e. capable of being occupied in their present state). Includes buildings that have been declared redundant or where re-letting for their former use is not expected. Includes single residential dwellings where they could reasonably be developed or converted into 10 or more dwellings.</i></p> <p><i>“Derelict land and buildings” is land so damaged by previous industrial or other development that it is incapable of beneficial use without treatment. Treatment includes any of the following: demolition, clearing of fixed structures or foundations and levelling. Includes abandoned and unoccupied buildings (including former single residential dwellings) in an advanced state of disrepair i.e. with unsound roof(s).</i></p> <p><i>It excludes land damaged by development which has been or is being restored for agriculture, forestry, woodland or other open countryside use. It also excludes land damaged by a previous development where the remains of any structure or activity have blended into the landscape in the process of time (to the extent that it can reasonably be considered as part of the natural surroundings), and where there is a clear reason that could outweigh the re-use of the site – such as its contribution to nature conservation – or it has subsequently been put to an amenity use and cannot be regarded as requiring redevelopment.</i></p> <p>The information needed to make the calculation is included in the NLUD-PDL reflecting information collected annually based on site returns made by local authorities. The most recent data is for 2006.</p> <p>All of the information is available to the local authority.</p>		

NI 170: Previously developed land that has been vacant or derelict for more than 5 years (continued)

Formula	<p>The proportion of the area of developed land that is vacant or derelict is calculated as follows:</p> $\left(\frac{a+b+c}{d}\right)*100$ <p>where:</p> <p>a = the number of hectares of previously developed land which have been vacant for more than 5 years as recorded on the NLUD database;</p> <p>b = the number of hectares of buildings that have been vacant for more than 5 years as recorded on the NLUD database;</p> <p>c = the number of hectares of land and buildings which have been derelict for more than 5 years as recorded on the NLUD database;</p> <p>d = the area in hectares of developed land within the area of the local authority.</p>		
Worked example	<p>In 2006 there were 14 hectares (ha) of vacant and derelict land on NLUD-PDL for more than 5 years, 15 ha of vacant buildings on the database for more than 5 years, and 5 ha of derelict land and buildings in NLUD-PDL for more than 5 years. The total hectares of developed land within the area of the local authority is 1,158 ha.</p> <p>The proportion of developed land represented by vacant and derelict land is therefore:</p> $\left(\frac{14+15+5}{1158}\right) = 2.94\%$	Good performance	A low and reducing percentage, based on baseline 2006
Collection interval	Annual	Data Source	
Return Format	Percentage	Decimal Places	Two
Reporting organisation	CLG, using data provided by English Partnerships		
Spatial level	Single tier and district council		
Further Guidance	<p>CLG statistical release "Previously developed land that may be available for redevelopment: England 2006"</p> <p>National Land Use Database of Previously-Developed Land</p>
